

Turn on the magic

The electric light has to a high degree freed us from living according to the rhythm of the day. When the sun disappears behind the horizon, our activities are not limited, as it was about a century ago. The incandescent light bulb was developed by Thomas Edison in the second half of the 1800s. At that time, no one realised the significance that the invention of light would have. Did you know that the incandescent light bulb is the only artificial light source with the same colour as daylight? When darkness falls, the warm light could be recreated with decorative light bulbs.

## Let your imagination run free

Most good stories start with "Once upon a time ..."  
The story of Danlamp started in a similar way back in 1931.  
Over the years, proud traditions and a constant wish to refine the  
products have made Danlamp a world leader in decorative light bulbs.

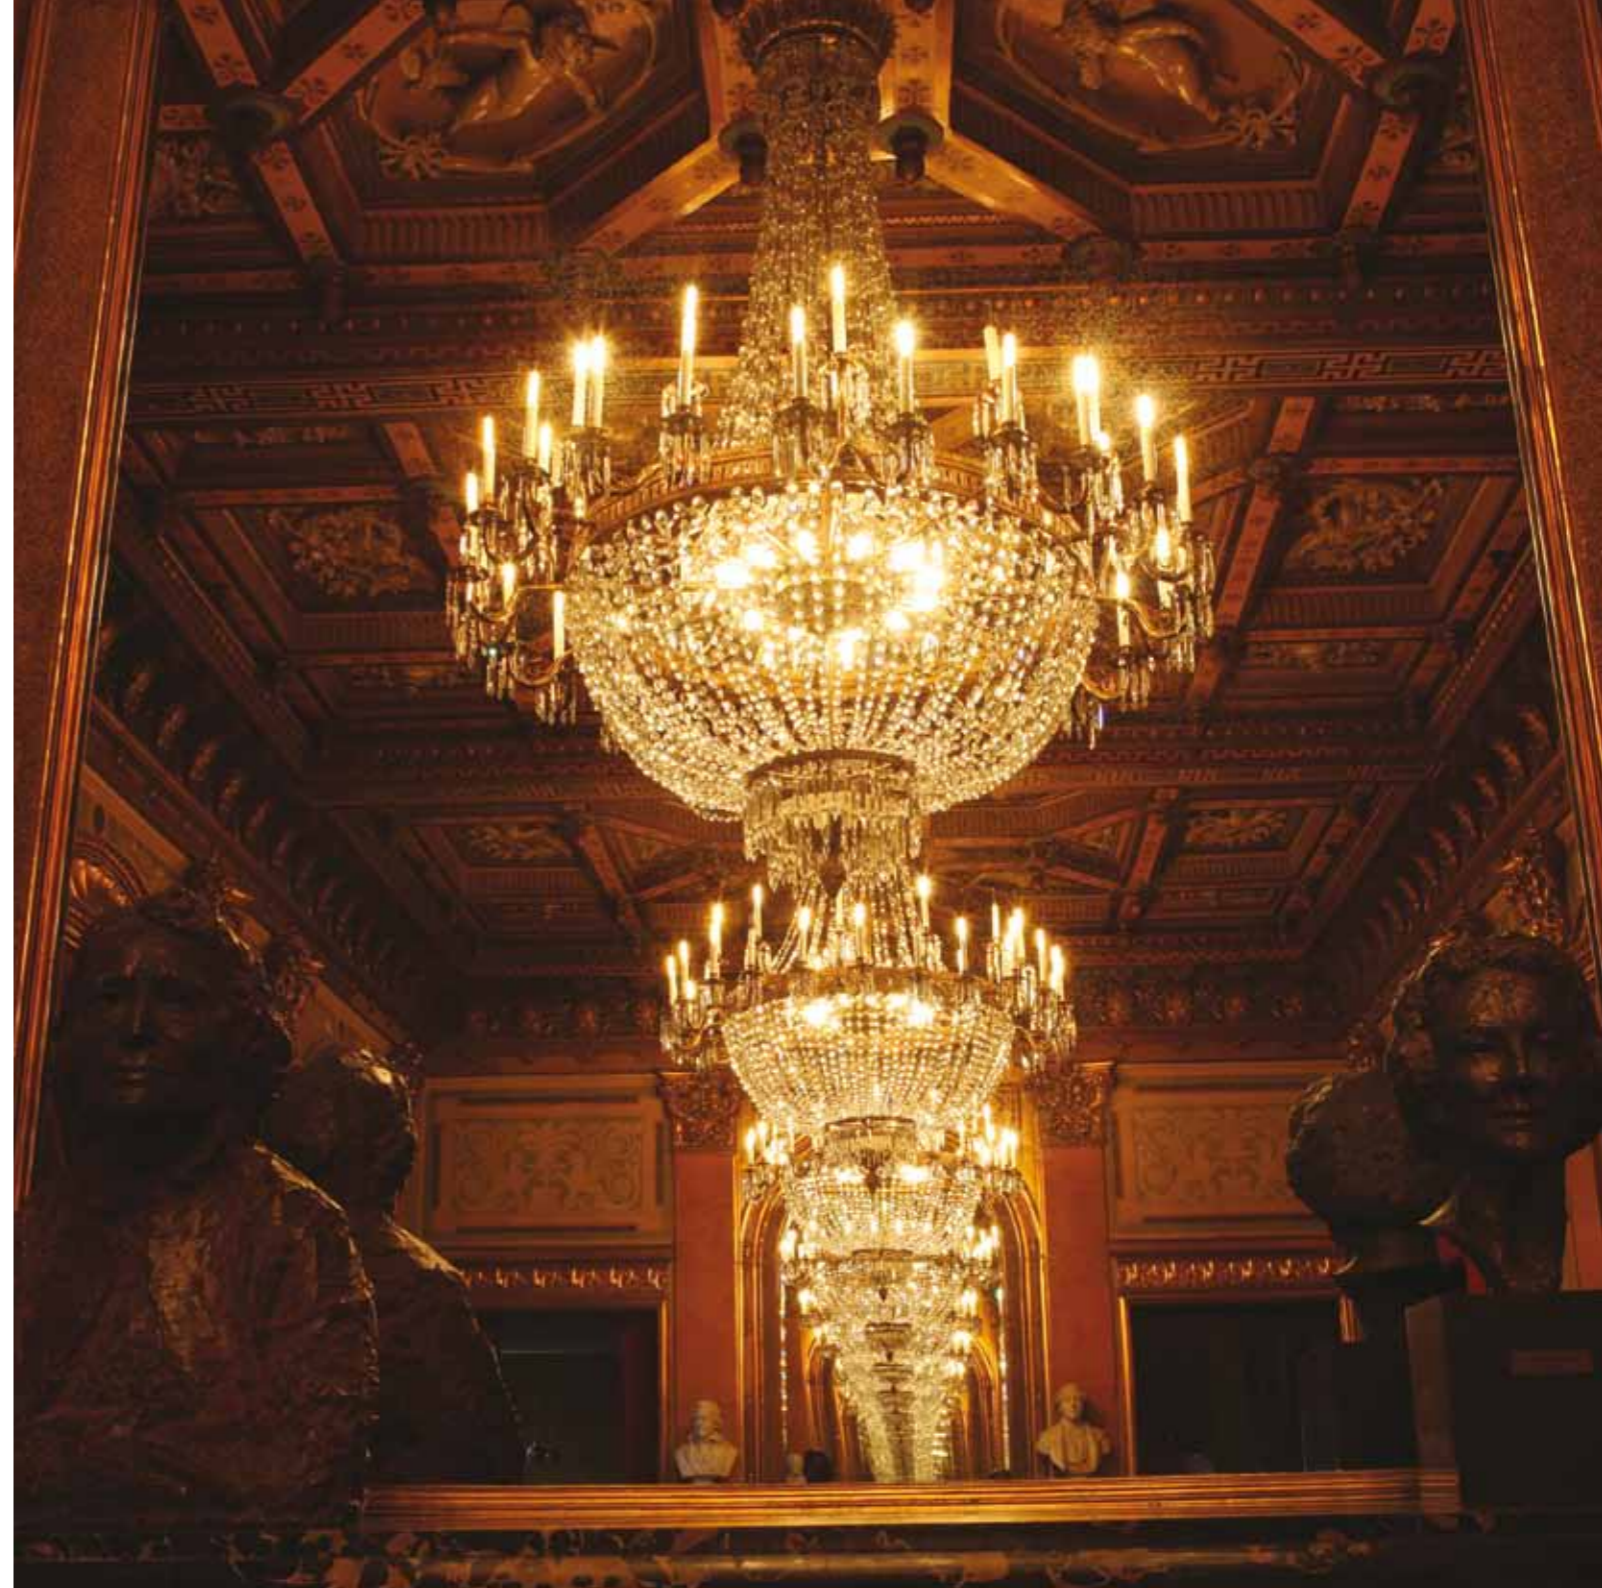

Light creates space. Different light creates different spaces.  
At Danlamp we have mastered the art of creating decorative  
light bulbs for every room.

The choice of decorative light bulbs is crucial for the quality of the lighting and the mood you want to set.

A filament and a glass bulb contain a world of expressive possibilities. Danlamp collaborates with a number of artists and architects to create a beautiful and stylish expression, and have contributed to the staging of large lighting events for, among others, the fashion house By Marlene Birger and the Royal Danish Theatre.

An experience in the right light

## Turn on the style

The keywords in the development of our product range are "the perfect light". There is also an emphasis on the aesthetics of our products. For us, a decorative bulb is not just a light bulb. We work with decorative lighting that creates classic and evocative light art, and we also place very high demands on service life.

Our attention to detail and our commitment to provide lighting for every room and every occasion has contributed to Danlamp's products frequently being thought into the design when it comes to lighting in homes and businesses around the world.

A young boy with light brown hair, wearing a red t-shirt, is shown in profile, looking intently at a large, clear glass jar he is holding with both hands. Inside the jar, several fireflies are visible, their glowing abdomens illuminating the glass. The background is dark, filled with numerous other fireflies, some in flight and others resting on foliage, creating a magical, glowing atmosphere. The lighting is soft, highlighting the boy's face and the texture of the jar.

Capture the magic again

A child's ability to capture impressions and moods is quite unique. Thinking back on experiences from childhood, you remember small and special things, so you can recreate the images. Reliving feels real and authentic. Especially the light that forms the framework for the whole situation has burned itself firmly into your memory. Our inspiration comes through the child's ability to capture the mood that light brings and the adult imagination to recreate it. The magic can be recaptured in the right light.

## The present pays tribute to the past

As a tribute to Thomas Edison, inventor of the incandescent light bulb, Danlamp has developed a new and unique bulb that casts a fantastic light upon the surroundings. We call it the Mega Edison.

This beautiful decorative bulb is ideal for use in outdoor lamps, in open lamps and as free-hanging decorative bulbs. We are talking about an experience here without the need for either a base or a shade. The Mega Edison has been especially developed to enhance the mood of both historical and modern environments.

Wishes and needs for lighting can vary. In our product range on the following pages you will find decorative bulbs for every room and every need.

### The Mega Edison creates great experiences

---

The Mega Edison is a unique piece of craftsmanship that can operate as an independent, free-hanging bulb anywhere in indoor environments.

The unusually large bulb creates an atmosphere and attracts attention with an unforgettable, fascinating light. The Mega Edison is specifically designed to create experiences in profile shops, showrooms and on music stages, but the bulb can also be used as a beautiful and effective lamp in private homes.

The clear bulb has a diameter of 12.5 cm and the filament, which is more than two metres in length, is entwined in a sculpted pattern.

---

Voltage .....	240V
Wattage.....	40 / 60 W
Luminous flux.....	200 / 300 lm
Base .....	E27
Lifetime.....	3000 hours
Diameter / Length.....	125 / 175 mm

### Twisted Candle

Beautiful and real-candle effect for chandeliers

Danlamp Twisted Candle acts like a candle and is specifically designed for crystal chandeliers and candlesticks in buildings that deserve a unique, evocative lighting. The long filament in the bulb forms a beautifully flame-shaped light with a warm glow and the twisted glass creates effective, decorative reflections. Danlamp Twisted Candle has a significantly longer life than conventional incandescent lamps, giving better running costs with longer intervals between replacements.

Voltage .....240V  
Wattage.....15 / 25 / 40 W  
Luminious flux...100/200/310 lm  
Base ..... E14  
Lifetime.....2000 hours  
Diameter / Length..... 35 / 95 mm

### Flicker Candle

Twisted Flicker Candle creates a living flame

Twisted Flicker Candle is a flame bulb that gives life, glow and mood to a room. The discrete, flame-light is specially suited for candlesticks, bracket lamps and lamps without shades. The bulb is made of clear twisted glass that forms beautiful reflections, and the delicate flame creates an atmosphere without bright illumination. Twisted Flicker Candle can be used as a fire-safe replacement for candles. Power consumption is only 3 watts and the robust quality bulb lasts for years.

Voltage .....240V  
wattage ..... 3 W  
Base ..... E14  
Lifetime.....2000 hours  
Diameter / Length..... 35 / 95 mm

### Tube Lamp

The classic tube bulb gives a perfect light

The classic tube bulb is a tubular bulb that gives a beautiful, cultured light with perfect representation of colours. Therefore the bulb is fantastic for painting lighting, as a reading light for lecterns and pulpits, as well as indirect lighting, for example, in display cabinets. The tube lamp is a functional, compact bulb that creates atmosphere and mood just like a candle. The handmade bulb works with all types of dimmers and is available in various types from 15-40 W.

Voltage .....240V  
Wattage.....15 / 25 / 40 W  
Luminious flux...100/200/310 lm  
Base ..... E14  
Levetid.....2000 hours  
Diameter / Length... 20 / 115 mm

### Church Candle

Classical and evocative lighting for churches

Danlamp Church Candle offers a traditional lighting with a warm, effervescent glow that fits stylishly into beautiful building environments. The unique soft light highlights the room's qualities and creates an intense atmosphere. The special light tone, which harmonizes perfectly with brass fixtures and candles, is formed by the bulb's long filament. Danlamp Church Candle has a significantly longer life than comparable incandescent lamps, which means longer intervals between replacement and better running costs.

Voltage .....250V  
Wattage.....25 / 40 / 60 W  
Luminious flux...200/310/475 lm  
Base ..... E14 / E27  
Lifetime.....2000 hours  
Diameter / Length... 45 / 130 mm

### Exterior Tubular

Tubular exterior bulb for decorative lighting

The original tubular exterior bulb was originally designed for use in boat lamps. This means that the handmade bulb is of high quality and has an unusually long life. Today, the bulb is used where there is a need for beautiful outdoor lighting in open lamps at entrances and in gardens and parks. The tubular bulb promotes the lines in cylindrical lamps, and the elaborate filaments create a warm, flame-shaped light. The exterior bulb can also be used indoors, where it is suitable for lighting at the dining table or as decorative lighting in smaller lamps.

Voltage .....240V  
Wattage.....20 / 33 / 60 W  
Luminious flux...100/200/310 lm  
Base ..... E27  
Lifetime.....3000 hours  
Diameter / Length... 38 / 110 mm

### Exterior Standard

The pear-shaped exterior bulb creates atmosphere

The pear-shaped exterior bulb is a beautiful, decorative bulb in the traditional pear form. Originally the bulb was designed for use in boat lamps, where there is special need for reliability and longevity. The handmade bulb gives a distinctive warm light and the visible filaments create a uniquely beautiful atmosphere. The exterior bulb is suitable for use in both outdoor and indoor lamps with a visible bulb.

Voltage .....240V  
Wattage.....20 / 33 / 60 W  
Luminious flux...100/200/310 lm  
Base ..... E27  
Lifetime.....3000 hours  
Diameter / Length... 60 / 105 mm

### Standard de Luxe

Sculptural light with character

The Standard de Luxe is designed for decorative purposes, for example, in shops, showrooms and restaurants. The bulb can be used as an elegant decoration that stands alone or with multiple bulbs. The beautifully twisted filament forms effective patterns of light and the decorative bulb is suitable for pendant lamps and lamps without shades. The Standard de Luxe is available in 25 W, 40 W and 60 W. The bulb's special effect can be emphasized by using a dimmer and the bulb can be used with all types of dimmers.

Voltage .....240V  
Wattage.....25 / 40 / 60 W  
Luminious flux.....70/140/200 lm  
Base ..... E27  
Lifetime.....4000 hours  
Diameter / Length... 60 / 105 mm

### Carbon de Luxe

Classical light art in new technology

The first electric lamps invented in the late 1800's had carbon-filament bulbs. The large rings of carbon filament spread a unique warm and decorative light. The successors to carbon-filament bulbs, filament bulbs, were not common for a few more decades. We have now recreated the original carbon-filament bulb in its original form. For manufacturing, we have used new technology with respectful consideration to the original bulb's special qualities.

Voltage .....240V  
Wattage.....40 / 60 W  
Luminious flux.....200/300 lm  
Base ..... E27  
Lifetime.....3000 hours  
Diameter / Length... 60 / 105 mm

### Globe de Luxe

Large incandescent bulb without lampshade

Globe de Luxe is a large, clear globe bulb with a distinctive filament in a decorative spiral. The bulb has a warm, intense glow and is an elegant highlight in any decoration – both classical and modern. Globe de Luxe is often used as a bare bulb – a unique decorative element without a lamp. The bulb is also a popular choice for Glass lamps that is increasingly used for shop lightning to create an exclusive and magical atmosphere.

Voltage .....240V  
Wattage.....25 / 40 / 60 W  
Luminious flux.....70/140/200 lm  
Base ..... E27  
Lifetime.....4000 hours  
Diameter / Length... 80 / 110 mm

### Edison Lamp

The most beautiful incandescent lamp

The Edison lamp casts a uniquely beautiful light on the surroundings and is ideal for use in outdoor lighting, in open lamps and as a free hanging bulb. Edison No. 1 can be used to emphasize the mood of historic surroundings, but it is also a modern style icon. The bulb is designed with a smooth filament that adds a special radiance to the light. When you choose Danlamp, you get a unique quality product from one of the world's leading and most experienced suppliers of incandescent lamps for decorative and technical purposes.

Voltage .....240V  
Wattage.....40 / 60 W  
Luminious flux.....200/300 lm  
Base ..... E27  
Lifetime.....3000 hours  
Diameter / Length... 64 / 150 mm
